Our Investors

In 2017, Carestream Dental was acquired by funds managed by Clayton, Dubilier & Rice, a leading global private investment firm, and CareCapital Advisors Limited, a specialist investment platform focused on dental and consumer health in Asia and part of Hillhouse Capital Management

1896

First dental radiographs made on Eastman NC roll film

1919

First "modern type" KODAK dental X-ray film released

1926

Eastman bite-wing dental X-ray film introduced

1941

KODAK ULTRASPEED Periapical Dental X-ray Film introduced

1963

Eastman bite-wing dental X-ray film introduced

1982

Dr. Francis Mouyen invents RadioVisioGraphy RVG technology

OrthoTrac introduced as the world's first orthodontic software practice management software

Our History

1983

Trophy develops the first prototype of an RVG system
SoftDent Practice Management Software first hits the dental market

1986

World's first microprocessor-controlled X-ray timer

1987

World's first dental digital radiography system (RVG 25000)

1993

PracticeWork's inception

1995

World's first digital sensor for film-based panoramic unit (Digipan)

1996

WinOMS CS Practice Management Software is first released

Our History

1997

Trophy Gestion Practice Management Software is introduced at the ADF Congress in France

1999

First sensor to equal or exceed film performance (RVGui) T4 is introduced as the first practice management software in Sweden

2000

KODAK INSIGHT Intraoral Dental Film introduced

2002

R4 dental software is launched in the UK

2004

World's first "one shot" digital cephalometric system (Trophypan C)

2007

Launch of the CS 9300 3D extraoral system

Our History

2009

Launch of the CS 1500 intraoral camera, featuring unique liquid lens technology

2011

Introduction of the CS 7600 digital imaging plate system and the CS 1200 intraoral camera & Launch of the CS 9300, with the highest resolution and lowest radiation in its class

2012

Launch of the CS 8100 extraoral imaging system

CS SOLUTIONS

2013

Launch of CS Solutions, a game-changing CAD/CAM solution

2014

Launch of the RVG 6200/RVG 5200 sensor with the CS Adapt module & Launch of the CS 8100 3D, the affordable 3D system

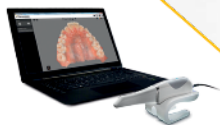

2015

Launch of the CS 8100SC and CS 7200

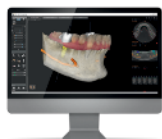

Our History

2016

Launch of the CS 3600 intraoral scanner, featuring restorative, orthodontic and implant workflow

2017

Launch of the CS 8100SC 3D extraoral imaging system and the Prosthetic-Driven Implant Planning module

&

Carestream Dental becomes an independent digital dental technology company

2018

The CS 9600 CBCT system, featuring responsive features and scalable design, is launched

Introduction of the CS 3100 milling machine, expanding the CS Solutions product line

&

Launch of the care management platform, Carestream Dental's first software-as-a-service offering

2019

Launch of the CS 3700

CS ScanFlow redefines intraoral scanning

Our History

2020

The Imaging and Case Collaboration (ICC) app, a simple and secure way to share images, is launched

CS 8200 3D, a compact imaging system with extended FOVs, is introduced

Evo Editions of the CS 8100 and CS 8100 3D Families are introduced

 **Sensei**
Cloud

An enhanced version of the CS 9600, including a Scan Ceph Module and AI, is launched

Care Management Platform is rebranded as Sensei Cloud

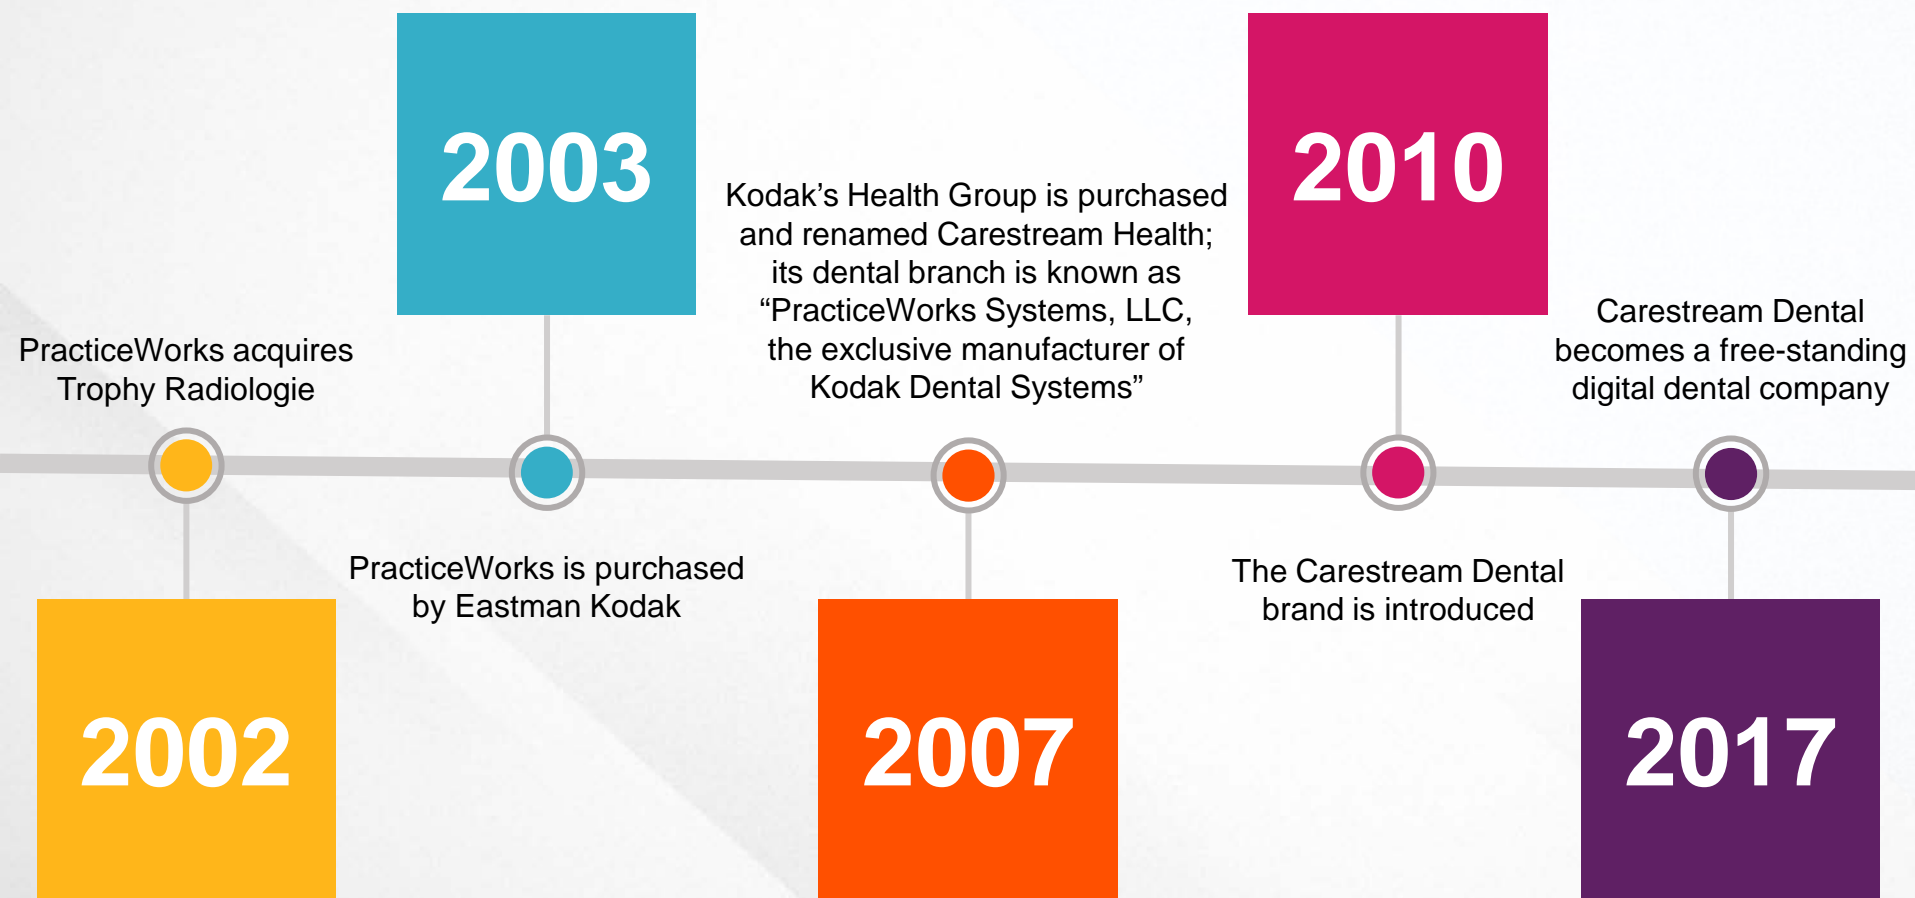

Sensei Cloud with orthodontic functionality introduced CS Model+ v5 with aligner design capability launched exocad Smile Creator integrated with CS Solutions
