

"**Medical System**" implements an Information Security Management System that complies with the ISO 27001:2022 standard and is committed to:

- * Ensuring the confidentiality, integrity, and availability of information processed, stored, or transmitted electronically or physically through the company's personnel and information systems.
- * The timely and rapid identification of and response to emergencies related to a breach (or potential breach) of the company's information security.
- * Ensuring that the information security policy and information security objectives are established and compatible with the company's strategic direction.
- * Protecting the company's investment in information and communication technologies.
- * Complying with the requirements of Greek and European Legislation regarding personal data management, communications privacy, intellectual property rights, etc., within its field of activity.
- * The continuous improvement of the Information Security Management System.
- * Defining the operational requirements regarding the availability of information systems.
- * Defining interested parties and internal/external issues concerning the company's operating framework.
- * Implementing a risk assessment process to identify threats and opportunities.

The Management of "**Medical System**" allocates the necessary resources to support the Information Security Management System, provides the necessary knowledge to its personnel, and raises their awareness on information security matters, utilizing their skills and capabilities.

"**Medical System**" fully recognizes the objectives of the Information Security Management System and supports their implementation.

The Management
